MIKUNI
RACING CARBURETORS

MIKUNI RACING CARBURETORS

All the motorcycles featured in this calendar use Mikuni Carburetors. The choice of most of the world's top motorcycle racing teams, Mikuni Racing Carburetors have helped garner countless National and International race victories and championships in Superbike, Endurance Racing, Formula Grand Prix classes and Drag Racing competition. Many of the motorcycles in this calendar are equipped with Mikuni RS Carburetors which are readily available from your local motorcycle parts dealer or Mikuni distributor.

RS, RSD SERIES CARBURETORS FOR SPORT BIKES

Mikuni RS sidedraft and RSD downdraft Series Carburetors are designed for in-line 4-cylinder performance motorcycle applications and have proven to be the choice of the world's top race teams. Required was a carburetor system which could satisfy the precise fuel metering demands and high flow volume required by both mildly and highly modified race engines. And yet, the carburetors needed to provide the smooth, controllable throttle response required by any rider pushing his motorcycle to its limits on the race track or under any high performance application. The carburetors needed to meter fuel correctly under a wide range of atmospheric conditions and tuning modifications while being easily accessible for quick trackside tuning changes.

Mikuni RS and RSD Series Carburetors meet these needs, offering superior horsepower gains with their maximum flowing smoothbore induction tract and radial flat slide design. An adjustable accelerator pump system helps to provide instant throttle response, particularly in the lower RPM range. The RS Series Carburetors feature a compact design which is 25% lighter than other performance carburetors, offer quick needle adjustment, and uses readily available standard Mikuni jets. RS and RSD Series Carburetors are available in complete bolt-on prejetted kits in sizes 34, 36, 38, and 40mm to fit in-line 4-cylinder applications.

HS SERIES CARBURETOR KIT FOR HARLEY-DAVIDSON

Mikuni's HS Series Carburetor Kit makes America's favorite motorcycle, the Harley-Davidson, perform even better. The heart of this kit is a Mikuni RS Series Racing Carburetor which features a smoothbore venturi for improved power, and an adjustable accelerator pump for instant throttle response. The result is a major increase in power and torque on both stock and modified engines, a smoother power transition from idle right up to full throttle, improved starting and better fuel economy.

The HS Series Kits bolt on easily in just a couple of hours. The carburetor and chrome air cleaner tucks into the bike like stock and comes ready to ride. Complete kits include a 40mm Mikuni RS Series Smoothbore Carburetor, choke and throttle cables, Mikuni alloy manifold and Barnett throttle assembly where applicable, K & N Air Filter and chrome filter cover, all mounting hardware, hoses and instructions for easy installation.

HS40-6 EVOLUTION KIT fits all 883cc thru 1340cc models from 1985.

HS40-7 SHOVELHEAD and IRON SPORTSTER KIT fits all 1971 to 1985 Iron Sportster and all 1970 to 1984 Shovelhead models.

FOR COMPETITION AND OFF ROAD USE ONLY. According to EPA Federal Regulations this product should not be used on street driven vehicles manufactured after January 1, 1979. Legal in California ONLY for racing vehicles which may never be used upon a highway or in other states where similar anti-pollution laws may apply.

Team Yoshimura Suzuki rider Miguel Duhamel in action on his Mikuni RS Series Carburetor equipped GSXR750 Superbike which is featured on the cover of this year's Mikuni Calendar.
